

Well I pay for the XM service and there is no local traffic and weather information in my area. So what! I listened to the traffic and weather 1 day and it seemed to keep people better informed than a local station. Why shouldn't someone paying for a service be able to hear such broadcasts. Maybe the local FM stations have something to learn about the quality broadcasts that XM supplies. The one thing that gets me is that this is a subscriber based service. There are still millions of FM radio listeners out there!! LEAVE XM & SIRIUS RADIO ALONE! I strongly urge you to :
reject NAB's petition 04-160

Thank you
Gerard Pfister
